Iron and Steel Slags - Properties and Utilisation

Reports from 1974 – 2000

Foreword

General Aspects

J. Geiseler:

Slag - Approved Materials for a Better Future

J. Geiseler:

The Working Group Metallurgical By-Products

Cement and Concrete

H.-G. Smolczyk:

Slag Structure and Identification of Slags

H.-G. Smolczyk:

Slag Cements and Alkalireactive Aggregates

J. Geiseler, E. Lang:

Long-Term Durability of Non-Air-Entrained Concrete Structures Exposed to Marine Environments and Freezing and Thawing Cycles

J. Geiseler, H. Kollo, E. Lang:

The Influence of Blast Furnace Cements on the Durability of Concrete Structures

E. Lang, J. Geiseler:

Utilization of High Slag Blast Furnace Cement for High Performance Concrete -

Influence of Pore Structure and Permeability

A. Ehrenberg, E. Lang, J. Geiseler:

Development of High Slag Blast Furnace Slag Cement with Improved Early Strength

P. Drissen:

Determination of Glass Content in Granulated Blast Furnace Slag

Road Construction Materials

H. Motz, J. Geiseler:

The Steel Slags – Characteristics, Properties and Quality Assurance

J. Geiseler, R. Schlösser:

Investigations Concerning the Structure and Properties of Steel Slags

J. Geiseler, P. Drissen, M. Kuehn, H. Schrey:

Liquid Slag Treatment Guarantees High Product Quality of Steel Slags

M. Kuehn:

Investigations to Decrease the Porosity of Blast Furnace Slags

G. Veith, R. B. Robinson, S. Wild:

Shear Strength, Permeability and Porosity of Lower Oxford Clay Stabilised with Lime and Ground Granulated Blast Furnace Slag

D. Mudersbach, J. Geiseler, M. Kuehn:

Optimised Mathematical Model to Calculate the Viscosity of Slags

P. Drissen, H. J. Engell, D. Janke:

Viscosity of Steelmaking Slags at Elevated MgO-Content

Iron & Steelmaking Residues

J. Geiseler, P. Drissen, M. Kuehn, B. Steffes:
Improved Dust Balance During EAF-Steelmaking

Fertilisers

J. Geiseler, M. Kühn:
Fertilisers from Iron and Steel Slags

Environmental Aspects

R. Bialucha, J. Geiseler, K. Krass:
Assessment of the Environmental Compatibility of Industrial By-products and
Recycled Materials

R. Bialucha:
Leaching Standard for Quality Control of Aggregates

D. Goetz, W. Gläseker, R. Bialucha:
Percolation Method for the Leaching of Aggregates

A. Ehrenberg, J. Geiseler:
Carbon Dioxide Emissions with Cement Production
